BRAIN STATION

BIOGRAPHY

I am a passionate programmer who loves his work. Dedication and care about his responsibility. I am always ready to learn new things to build my career in challenging and the dynamic profession as well as to become a specialist in technical with committed & dedicated people, which will help me to explore myself fully and realize my potential. I am working with PHP since 2018, Laravel since 2019 and JavaScript since 2020. Now I'm learning REACT JS for becoming full-stack web development. My career started at Brain Station 23 as an Associate Software Engineer and my responsibility is web development, API development and system analysis. After all, I strongly believe that confidence is the key to success. I can do anything that can be done by someone. I have strong desire to build up my career in an ICT related profession

EXPERIENCES

Jan 2020- Continuing — **ASSOCIATE SOFTWARE ENGINEER**
Brain Station 23 Limited

May 2019 – Dec 2019 — **TRAINEE SOFTWARE ENGINEER**
Brain Station 23 Limited

PROJECTS

1. Fosholi Web

Technology Used: JavaScript, React, Redux, Saga etc.

Technical Responsibility: Helping with web redesign, Added new searching for question bank, Bug fixed and improved performance, Added default location, Implement new 404 page.

Project Link: https://fosholi.com/

Short Description: Fosholi is an award wining project. This is a platform to help farmers with their problem via mobile app and web. It's gives every week weather information which is gather from satellite and give warning any kind of disease. Farmer asked their question and get answered from any agriculture expertise.
.
